French   **B1**
Spanish   **B1**

Certifications
Introduction to computer networks - Fundação Bradesco.
Introduction to JavaScript - Fundação Bradesco.
Create a Simple Website using html, css and javascript – Fundação Bradesco.
Data Modeling – Fundação Bradesco.
Innovating with CSS – Fundação Bradesco.
Basic HTML – Fundação Bradesco.
Ethics in systems development – Fundação Bradesco.
Software Development – Cubos Academy.
Soft Skills – Cubos Academy.
Success LinkedIn – Cubos Academy.
Front End Development Libraries – FreeCodeCamp.
JavaScript Algorithms and Data Structures – FreeCodeCamp.

Skills
Programming Technologies: C++, PHP, Java, JavaScript, CSS3, HTML5, C#, Assembly,
Arduino, Ionic, Angular.JS, Laravel, Python, TypeScript, React.Js, Bootstrap, Sass, GIT,
Next.Js, Angular Material, Material UI (MUI), Kendo UI.
Database: Firebase, MySQL e PostgreSQL.
Operational systems, Network, Systems Analysis.
Software management (Linux, Windows, MACOS) and apps.
Computer installation and maintenance.
Office pack (Word, Excel, PowerPoint) and LibreOffice.
Image editing: Photoshop, Canva, gimp and Inkscape.
Design skills: UX/UI Design, Prototyping, User Research, Interaction Design, Wireframing,
Figma Proficiency.

Volunteer work
Interact/Rotary administrative assistant 30/04/2016 - 20/09/2016.
I had the duties of treasurer at Interact, there, we carried out social actions to raise funds and
later made them available for the eradication of diseases, solidarity projects for children's and
elderly homes, exchange programs for students from public schools, among other causes.

Employment History
Web Development Freelancer 2018 – 2020.
- Mobile development with ionic v5, angular, sass and typescript.
- Web development with PHP, HTML, CSS and JavaScript.
- Projects using C#, C++ and Assembly.
- Canva, Gimp and Inkscape.
- Software management: Linux and Windows.
- Office pack and LibreOffice
- Database: MySQL and Postgres.
- Operational systems, Network, Systems Analysis.

Atitude Comunicação Web and PHP Developer 2020 – 2021.
- Web Development with PHP, HTML, CSS, JavaScript and for databases MySQL.
- Photoshop, Gimp and Inkscape.
- Software management: MACOS and Windows.
- Office Pack.
- Systems Analysis.

My first professional experience at a company, there I used to manage the websites making bug corrections and developing new features besides participating at meeting with the clients and doing systems analyses, I also design and developed a couple of websites with PHP, HTML, CSS, JavaScript and Bootstrap, for the databases we used MySQL and PhpMyAdmin. To manage the files, we used the FileZilla to connect at FTP server and publish the websites. Those websites, was usually with a Backoffice so the clients would be able to keep posting, change banners, add users, and other things, so all of them was dynamical and updated every day, a lot of clients ordered this kind of website to be a "private" cloud to them, like iCloud or google drive, updating with marketing purpose for its own company. It was an amazing first experience with a team, there I improve myself a lot and learn how to manipulate Photoshop and design sites, I also developed my passion for frontend and design while was working with them.

Agência Zum Web and PHP Developer 2021 – 2022
- Web Development with PHP, HTML, CSS and JavaScript and for databases MySQL.
- Photoshop, Gimp and Inkscape.
- Office Pack.
- Systems Analysis.

I worked on developing the website for a campaign for a major pharmacy chain in Brazil. This campaign involved the registration of coupons and a lottery, and it was also automatically updated with the winners. This campaign had a Backoffice and the website that was used for the clients register their coupons. The Backoffice was used to make the updates with the winners, prizes, and alerts of another campaigns. I mad two of these websites for them, one in 2021, and other in 2022. I also developed a similar system to a toy story for a Chrisman's campaign, it had a Backoffice and a website too. The technologies in each case were PHP, HTML, CSS, JavaScript and MySQL for the databases. The FileZilla was used to make the FTP connection and publish the websites.

S2 Pets Front-end developer Feb./2022 – Sep./2022.
- Mobile and web development using ionic with Angular.JS v6, TypeScript, Angular Material and for databases we used firebase.
- Agile Methodology and Sprints programs.
- Git versioning using GitLab.

It was my first company experience developing for mobile with a hybrid technology, and my first experience only as a Frontend Developer, the others I used to play the full stack role. There I worked on developing a BMI calculator for animals with nutrition purpose since we worked closely with pet stores and vets, I also developed the lost and found functionality with geolocation for the MEUPET app, there people can use pin and location to report lost and found of animals in the streets of São Paulo, it had a feature that notified people when an animal was reconnected with their family. Additionally, I worked on the web development of the landing page and contributed to the app's dashboard where we could saw the apps stats and bugs reports.

Ambisig (Lisbon - Portugal) Front-end developer Sep./2022 – Aug./2023.
- Frontend development using Ionic with React.Js and Next.Js also react with redux and hooks.
- Agile Methodology and Sprints programs with Trello.
- Manual testing and bug fixing.
- Git versioning using Azure Repos.

My first international experience, I was hired to help the frontend team at SCOT project, it was a Portuguese system for applying traffic ticket built in Ionic with React.JS, I was responsible for bug and design correction, manual testing and developing new features, such as tables with the last traffic tickets applied, a search mechanism of address, and others. I also participated on the development of SIARL, a Coastal Resource Management System focused on adapting to Climate Change Scenarios, in this one, we used React.JS latest version with Next.JS and redux. Since I participated from the beginning, I did the Figma prototype of the system.

Capgemini (Lisbon - Portugal) Senior Front-end developer august/2023 – present.
- Frontend development using with React.Js latest version with Next.Js and react hooks.
- Styled components based on MUI.
- WebRTC connection with stomp for Kurent for the streaming.
- Unitary tests and bug fixing.
- Git versioning using GitLab.
- Agile Methodology and Sprints programs with Jira.
- Prototype using Figma.

All my journey lead me to this position, Senior Frontend Developer and the leader of a small team. The project I'm currently allocated is LIVE, a streaming system for the health ministry of Portugal. We technology we use is React.JS latest version with Next.JS, styled components based on MUI, WebRTC Kurent for the streaming connection, ESlint to ensure the code quality. I also developed the Figma since beginning, so I play the Frontend and Designer Role.
